

SEGNO | INDOOR - OUTDOOR

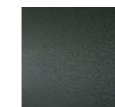

design Leonardo Talarico

Umbrella rack with structure consisting of two elements (rings) and a stand made of Ø12 mm 304 stainless steel rod welded together, and a Ø25 cm tray-base made of 2,5 mm thick deep-drawn and laser-cut 304 stainless steel plate, with technical details that allow its placement to the lower ring. A slip proof transparent matt varnish is applied to the lower part of the tray-base.

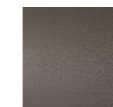

Finish with polyester epoxy powder coating in gunmetal grey or burnished colour.

Floor support provided by PVC feet also suitable for outdoor use.
